## ABOUT ME

Architect with over 5 years of professional experience in designing and delivering residential, commercial, and landscape projects from initial concept to final execution. Skilled in master planning, 3D visualization, site documentation, CAD drawings and sustainable design. Experienced in coordinating with multidisciplinary teams, supervising on site work, and managing project timelines and quality. Passionate about integrating context sensitive design, landscape & environment conservation, and modern design techniques. Eager to contribute architectural expertise and design vision to a forward-thinking UAE-based firm.

- Honors**, in my final year thesis project  
March 2021  
*National College Of Arts, Lahore, Pakistan*

## SKILLS

### Personal Interests and Traits

- Creative Thinking
- Art and Architecture
- Architectural Model Making

### Personal Skills

- Teamwork
- Punctuality
- Collaboration

## WORK EXPERIENCE

### Architect

23/10/2023 ----- 12/01/2025

*SIDRA ARCHITECTS AND INTERIOR DESIGNER*

I oversaw the full design to execution process for commercial, mixed use, residential and landscape projects. I prepared architectural drawings, masterplans and construction documents, developed detailed 3D visualizations for interiors and exteriors, coordinated with engineers, contractors and interior teams to ensure design feasibility and quality, conducted site visits to supervise construction, and liaised with clients to present proposals and incorporate their feedback.

### Design Partner

10/09/2022 ----- 19/09/2023

*SYMBIOS DESIGNS*

As Partner Architect at Symbios Designs, I managed client engagements from first meeting through to project delivery, gathering requirements, preparing proposals and contracts, and handling all project documentation. I developed design concepts and detailed architectural drawings, created realistic 3D renderings and presentations tailored to each client, and ensured projects were delivered on time and to required quality. By combining creative design work with administrative oversight, I helped deliver architectural solutions that met client expectations and maintained professional standards.

### Assistant Architect

12/01/2022 ----- 02/09/2022

*CHOB DESIGNS*

At Chob Design, I coordinated with structural engineers and led cross-functional teams of engineers, contractors, and consultants to ensure cohesive project execution. I designed bespoke furniture for clients, prepared detailed working drawings, and contributed to the design and execution of interior, healthcare, and residential projects. I also resolved on-site challenges and ensured that all project outcomes met the required quality and design standards.

### Junior Architect

16/05/2021 ----- 05/01/2022

*ARCHANGLE STUDIO*

As a Junior Architect at Archangle Studio, I was responsible for conducting research to support design development, preparing client presentations, and assisting in meetings by documenting minutes and key decisions. I also contributed to the preparation of architectural drawings and 3D visualizations for ongoing projects under the guidance of senior architects.

### Intern Architect

2018

*CHOB DESIGNS*

As an Intern Architect at Chob Design, I assisted in research and concept development, prepared presentations, and developed architectural drawings. My responsibilities also included conducting site visits, managing project documentation, performing market research, and coordinating with vendors. I worked closely with a senior carpenter to design bespoke furniture and ensure accurate implementation of design drawings.
