PROFILE SUMMARY

Senior Civil Engineer with more than 20 years experience in planning, managing, executing, and quality assurance review for various types of simple and complex construction projects locally and internationally.

Manage all aspects of municipal infrastructure growth, rehabilitation, maintenance and replacement projects including planning, project management, design, construction, quality control, financial management, public safety, requests for approval and work acceptance

Due to my frequent work trips in many countries during the year, I have gained a high level of experience in dealing with different types of projects including but not limited to restaurants, residential compounds, hospitals, schools and many more, with different cultures, environments and circumstances which made me very confident and capable of handling multiple projects and solving different kinds of any complex situation during the project phases.

And eventually, I can guide and assist the Company to its highest level of performance, and to find ways to improve the marketing capabilities and foster strong relationship with potential customers, partners and supplier/ seller.
